Organisation Overview:

I have recently discovered the NGO Knightly and have decided to create a website for their organisation because I can relate to their motivations and the founders' stories.

Organisation Name: Knightly

Founded in 2025, Knightly is an NGO focused on nightly protection within neighbourhoods and areas by providing additional light and cameras in public areas, for public protection. They use solar panels for their lights and in collaboration with the government aim to get as many lights and cameras up as possible to reduce violence and crimes in South Africa.

Mission: Reduce crime and ensure justice in South Africa with the help of surveillance.

Target Audience: Public commuters, people in unsafe neighbourhoods, funders, public protection groups, and government protection forces.

Website Goals and Objectives

Goals

- Inform on crime hotspots and statistics
- Inform on how to protect oneself
- Reach their target audience

Indicators

- Increase in user traffic
- Increase investors
- Increase organisation creditability

Current Website Analysis

Current Website:

Their current website is non-existent.

Weaknesses

- Lack of online presence
- Lack of brand identity
- Lack of public known contact information
- Lack of search engine optimization

Improvements

- Develop a free use website
- Share contact information
- Become creditable
- Increase online presence

Features and Functionality

Due to the previously stated lack of website and online presence I aim to make a website that is informative of KNIGHTLY's mission. This would require:

Features

- Home page
- Projects page
- Protection page
- About page
- Contact page

Functions

- Mobile first responsiveness
- Social media links

Design and User Experience

Colour Scheme:

This colour scheme was chosen specifically to highlight the need for the public service they wish to provide for their communities.

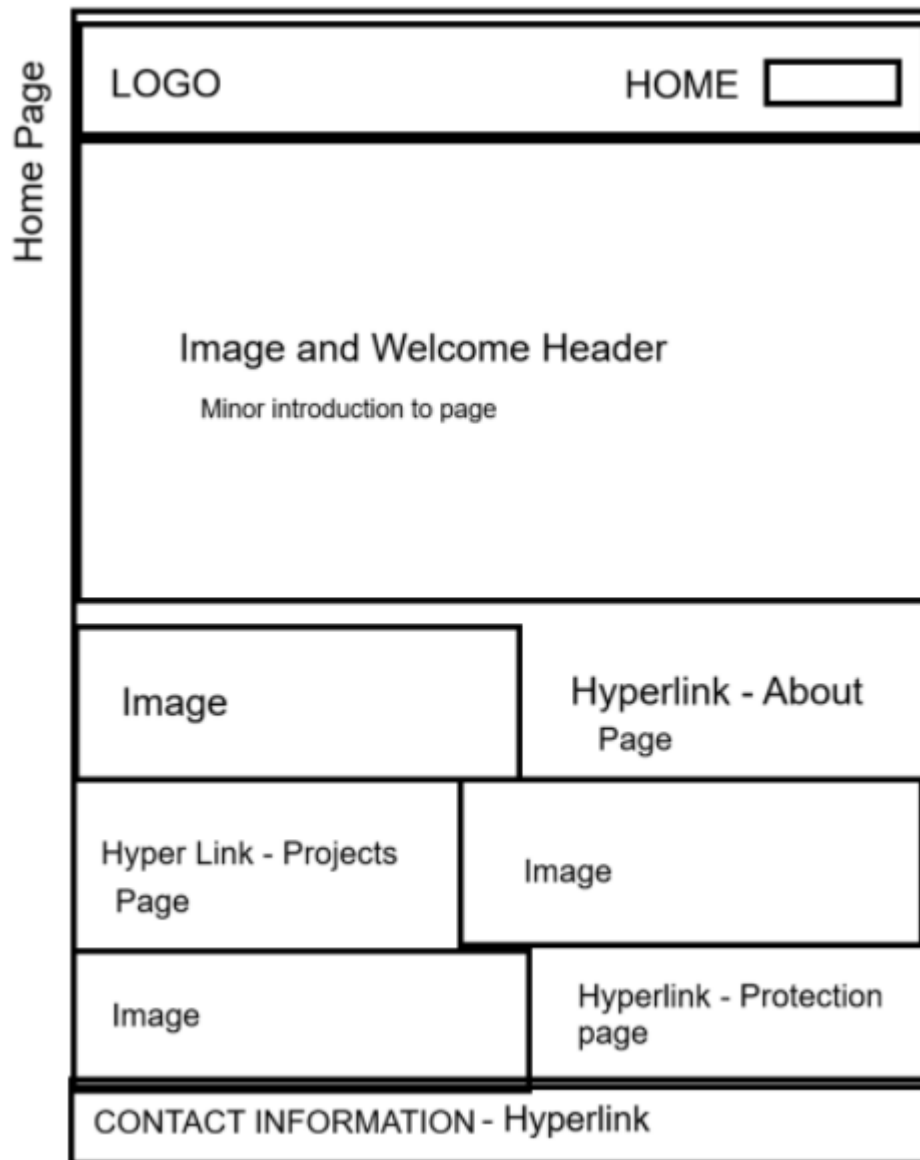

- Shades of Dark blues
- Yellow
- White
- Black

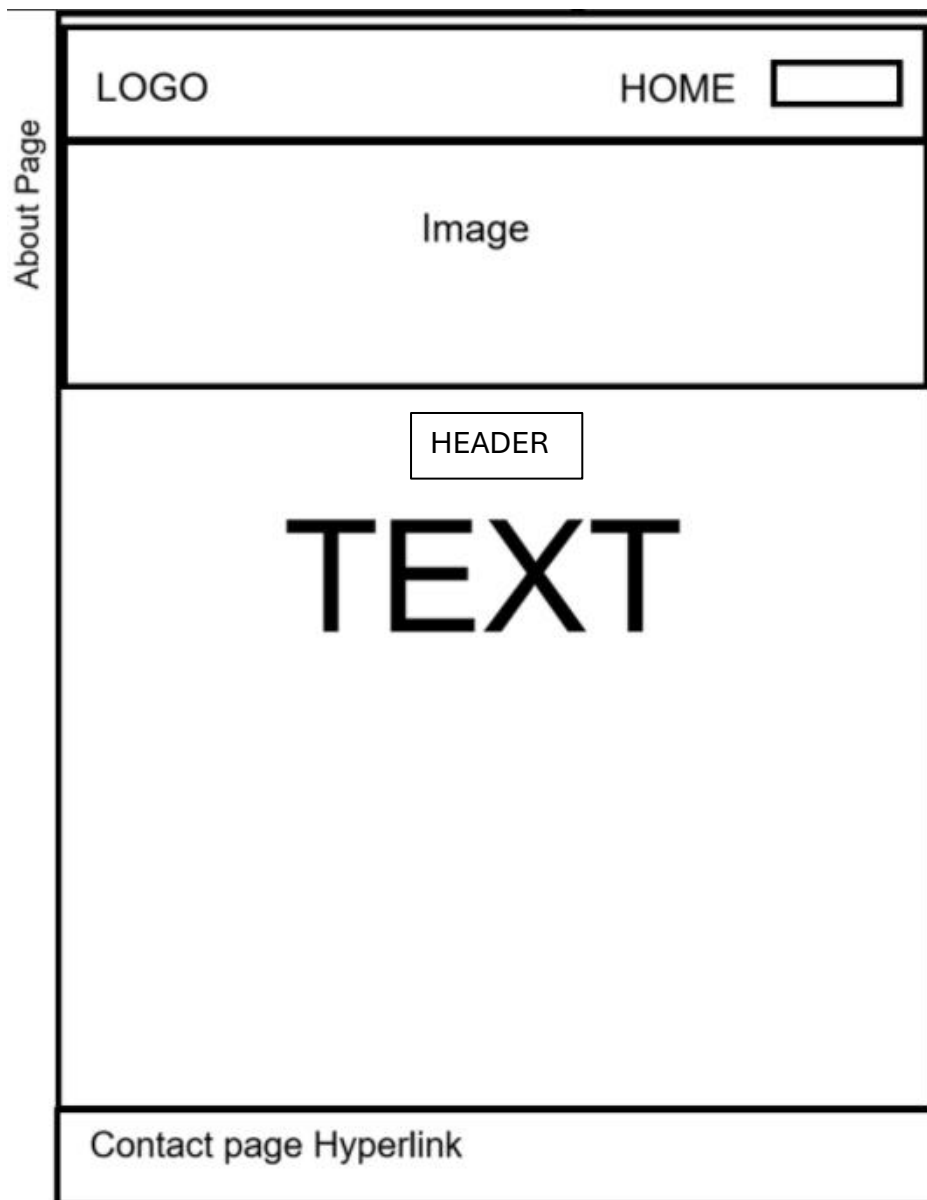

Typography:

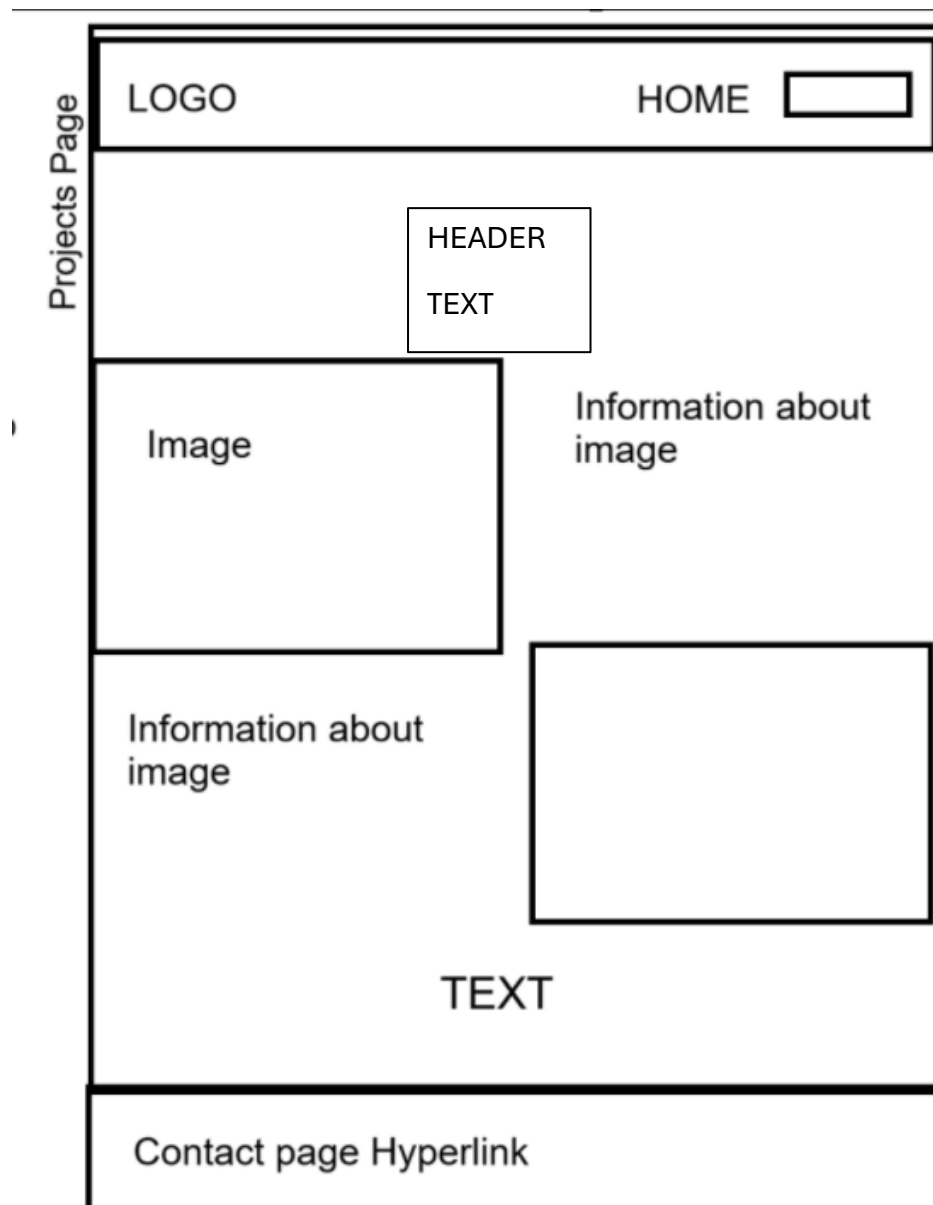

The fonts chosen are solid and easy to read while still being stylish. Emphasizes professionalism and transparency.

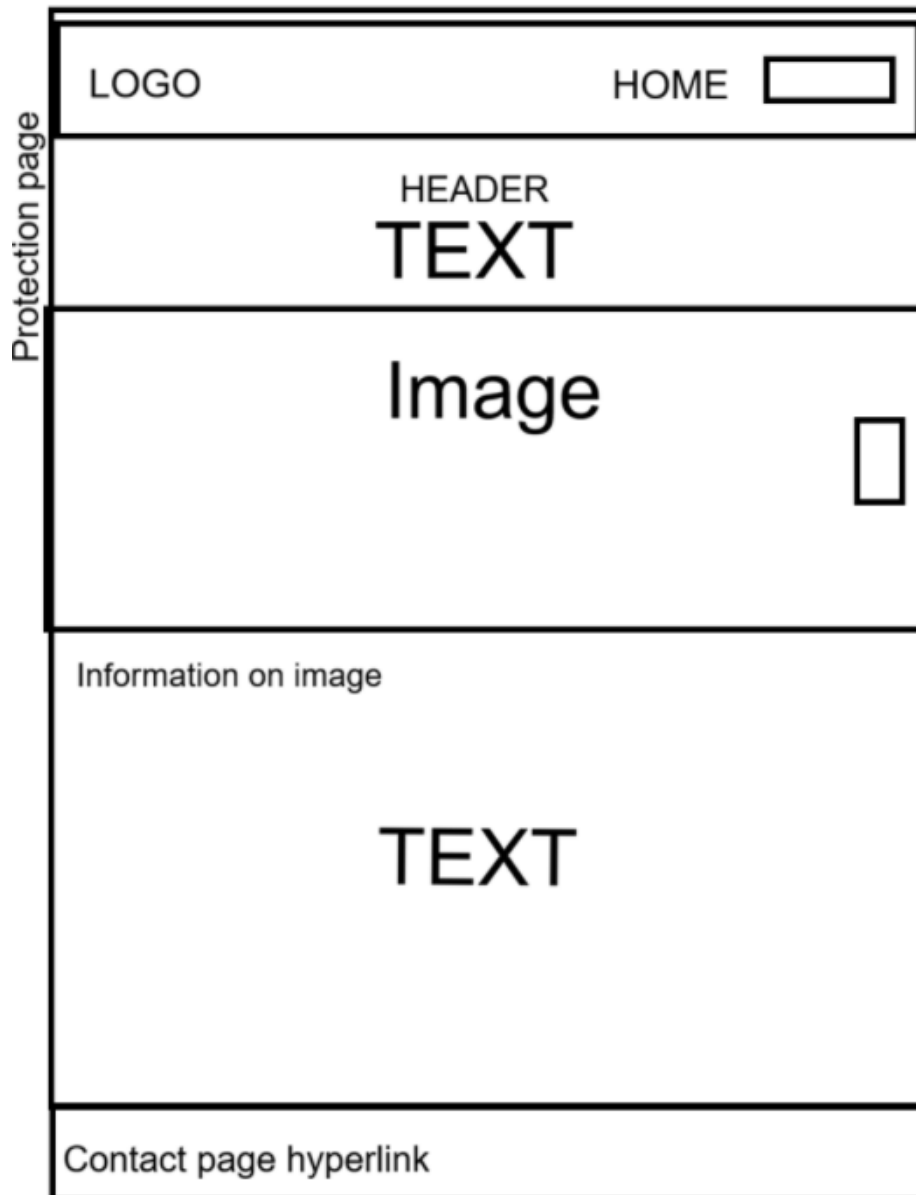

- Noto Sans
- Merriweather
- Playfair – for headings

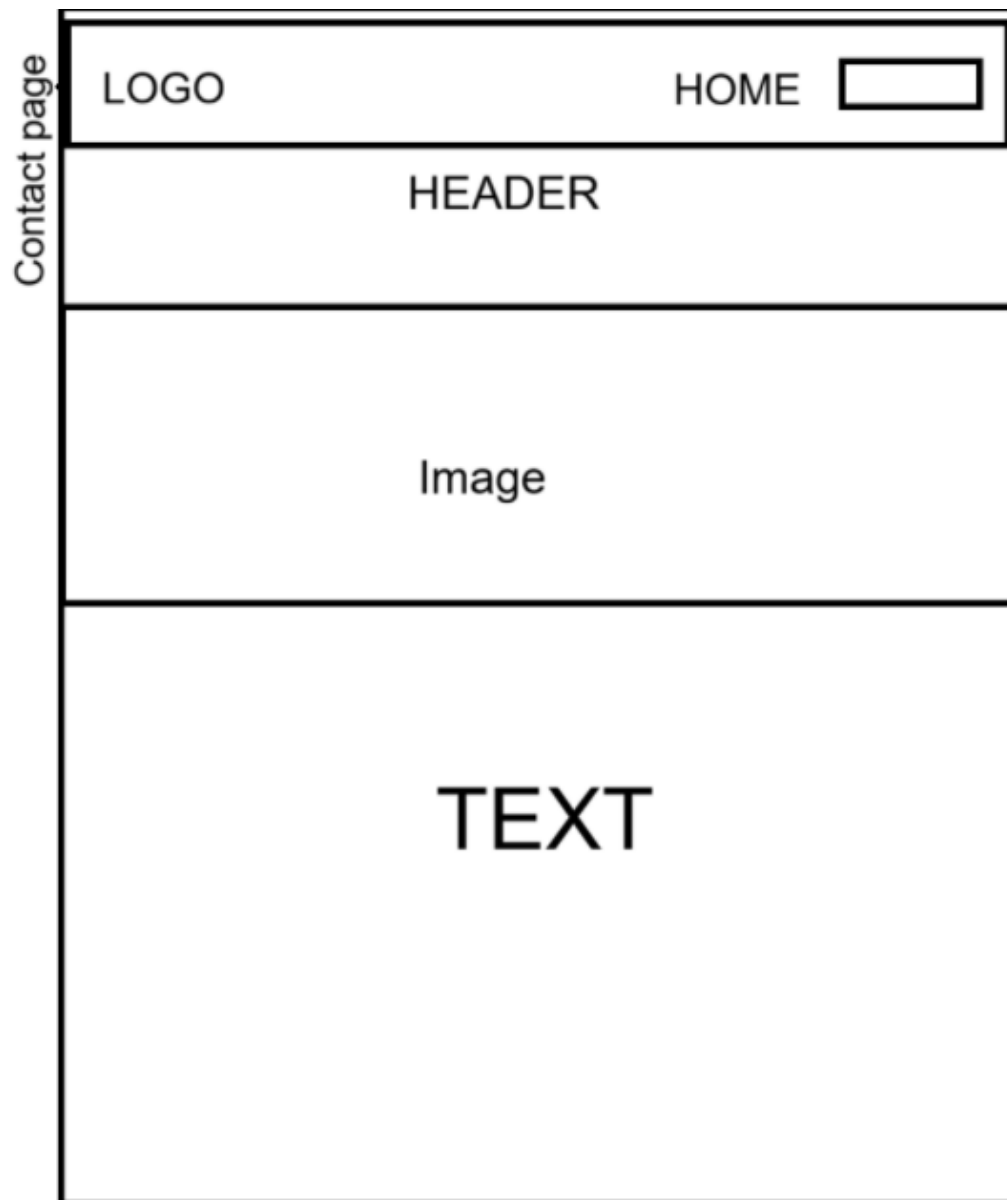

Wireframes

Technical Requirements

Hosting

- Afrihost (www.afrihost.com)
- Domain: www.knightly.co.za

Language Framework

- HTML, CSS, JavaScript

Timeline and Milestones

Start Date	Time Frame	Milestone	Developments
10 April 2026	2 days	Creation of proposal	• Research on organisation • Developing website layout • Discovering resources
13 April 2026	1 day	Submit proposal	• Completion of Proposal • Development of HTML • Receiving feedback
14 April 2026	6 days	Creation of medium website	• Managing file structure • Creating web pages • Using HTML • Using appropriate resources
20 April 2026	1 day	Summation of HTML files	• Completion of HTML pages • Clear folder structure on GitHub • Creation of CSS style sheet
21 April 2026	5 days	Decoration	• Selecting styling webpage elements • Applying Decoratives to the web pages
26 April 2026	3 days	Applying responsiveness	• Making use of developmental tools • Styling for mobile

30 April 2026	1 day	Submitting the updated HTML pages	• Submission • Receiving feedback
31 April 2026	8 days	Implementing JavaScript	• Adding functionality • Applying SEO • Creating forms with HTML
8 May 2026	1 day	Submission of Final draft of website	• Deploying website onto free website

Budgeting

Development	R0	Being made as a donation
Registration	R197	Once off payment
Renewal of domain	R99	Yearly
Maintenance	R500	Updates and support Monthly
Totals	R346
